Web Developer Intern - Summer 2015

Stilnovo USA | Web development and maintenance for the company. Web site was built and maintained using Magento from the early stages. Working alongside the design team.

Web Developer & Designer

<http://matanuchen.com> | Full web development and design for my personal website. The site contains my portfolio for development and music, as well as a short bio, and contact form.

Web Developer & Designer

<http://coldwrecks.com> | The site was developed on ASP.NET MVC 4.6 in order to practice using this technology. It uses the Tumblr API to blog posts that appear on the homepage.

Web Developer & Designer

<http://eliwhitneyband.com> | **This site currently redirects to the Cold Wrecks website.** Full web development and design for the website. The site is a central hub for the band Eli Whitney and the Sound Machine. Powered by a tumblr script to fetch posts from a specific blog. Built on Bootstrap 3 and is responsive.

Web Developer & Designer

Z&J Management, LLC. | Full web development and design for the website. A one-page site to showcase the construction company with a contact form. Currently not live.
