Experience

Web Developer Summer 2015

France and Son | Web development and maintenance for the company. Web site built and maintained using Magento. Working alongside the Design team.

Web Developer Summer 2015

Stilnovo | Web development and maintenance for the company. Web site built and maintained using Magento. Developed from the early stages of the site and company alongside the Design team.

Web Developer & Designer

http://matanuchen.com | Full web development and design were done by me. It is a personal webpage that contains my portfolio as well as a bio.

Web Developer & Designer October 2014 - Present

http://eliwhitneyband.com | Full web development and design for the website. The webpage is for a band and contains a homepage for news, powered by a tumblr script that retrieves posts from a specified tumblr blog. Built on Bootstrap 3 and fully responsive.

Web Developer & Designer

(not live) | Full web development and design for the homepage. One page landing page with a header, about, portfolio, and contact options. Built on Bootstrap 3 and fully responsive.

Coursework Project | Significant Classes in C++

Rational Class | Assignment outlined instructions for creating a rational number class to be used by others. Full arithmetic operations were to be capable, along with several input options.
